By a Series of TABLES fuited to the feveral Exchanges
between the COLONIES and BRITAIN, adapted to all the
Variations that from Time to Time have, or may happen.
With TABLES reducing the current Money of the Kingdom
of IRELAND into Sterling, and the contrary, at all the
Variations of Exchange.

ALSO.

A Chain of TABLES for the interchangeable Reduction of the Currencies of the Colonies into each other.

And many other useful TABLES relating to the Trade in A M E R I C A.

By J. W R I G H T, Accomptant.

The THIRD EDITION.

LONDON:

Printed for the Proprietors, by J. SMITH, Wellclofe Square, and fold by Messieurs HAWES, CLARKE and COLLINS, Booksellers in Paternoster-row; and by the Booksellers in Great-Britain and Ireland.

M D CC LXV.

(Price bound SEVEN SHILLINGS.)

THIS Work is entered at Stationers-Hall, according to Act of Parliament.

TO THE

SAMUEL Lord SANDYS,

First Commissioner for TRADE and PLANTATIONS.

My LORD,

THIS Work, calculated for the general Use of all His Britannic Majesty's Subjects, whether residing in Europe or America, who have Property in, Connexions with, or Trade to that Part of the World, I humbly presume naturally recommends itself to Your Lordship's Patronage.

The very numerous Subscription this Work has been favoured with, from many eminent American Merchants, and other Persons of Note, sufficiently evince the Utility of the Undertaking, which I hope will give Satisfaction: Your Lordship's deigning to accept of a Dedication of this Work, crowns the Subscription List, which otherwise would look like a great Body without a Head; but being graced with Your Lordship's Name, becomes now uniform.

I do not presume that it will add any Thing to Your Lordship's Honour, in permiting me to present this Work to Your Lordship; nor, on the other hand, will it, I hope, in the least depreciate Your Lordship's honourable Character; but will rather be, in the Eyes of the impartial and right-judging World, a Testimony of Your Lordship's kind Disposition, towards the Encouraging of any Thing that is new and useful to Mankind, in particular in what relates to America.

THAT the Affairs of the British American Colonies may flourish under Your LORDSHIP'S Administration, with Honour and Satisfaction to Yourself; and that You may enjoy all Health and Prosperity, is the hearty Wish of

Your LORDSHIP's

Most devoted, obliged

And humble Servant,

Odob. 8,

JOHN WRIGHT.

INTRODUCTION.

HE Trade carried on between Great Britain and her American Colonies hath been for many Years very confiderable, and of late Years greatly increased, and still daily increasing; and is happily in so sourishing a State at present, as to make up a very great Part of the extensive and vast Trade carried on by Great Britain and Ireland. The very great Quantities of Goods and Merchandize that are yearly exported to the Colonies, most of them of the Manufactory and Produce of Great-Britain and Ineland, and the very numerous Fleets that annually arrive from the faid Colonies richly laden with the various and valuable Productions of the western World, which almost every favourable Wind wasts over from the Bosom of the Atlantic Ocean, are daily Testimonies of the Importance of the Trade to the Colonies, to fuch a Degree, as to be the principal Source of the Riches, Grandeur and Power of the British Nation, to which it has at present arrived, by the auspicious and benign Dispensation of Providence to the Wonder, Envy, and Jealously, of the neighbouring Nations; and our good Neighbours the French in particular, who for near a Century past have made repeated Efforts, both by open War, as well as by fly and treacherous Methods, and every Machination in their Power, to deprive us of the Sources of Wealth and Power, which the Trade to America fo evidently administers to Great-Britain. But the joyful Days are come, that the Bonds of French Power in that Part of the World are now broke afunder, and their Attempts to destroy or circumscribe the Bounds of the British Colonies, and consequently the Trade thither, happily fubverted, overset, and destroyed, by the refulgent Beams of Providence, which have so remarkably shone on the British Arms, in the Course of the late War, and has placed the British Flag on every Fort and Port of the northern Part of the Continent in America (as well as several of the southern Isles) where the French Flag waved before; fo that it may now be faid in one respect of the British Dominions, what Puffendorf, in the Introduction to his Roman History fays, of the Extent of the Roman Empire, which he fays, was only bounded by Nature; having, for Bounds on the North, the frozen Hyperborean Mountains of Sythea, and on the South the burning

fandy Defarts of Africa. In like Manner the British Empirin America, is at present only bounded by the Inclemency of Cold, and uninhabitable Woods and Wilds of Terra incognita Borealis, or the unknown Regions of the North. And also on the West of Canada, by Countries little known to the Europeans, which, as they lay in temperate and inhabitable Climates, 'tis hoped the British Nation will, in Process of Fime be better acquainted with than at present.

'Tis certain, the present great Extent of the British Dominions in America are situated in, and comprehend all the Diversity of Soil and Climate, as is to be found in all the inhabitable Parts of the Globe; and consequently 'tis highly probable that every vegetable Production, that is now raised in all o her Parts of the World, will thrive when transported to a Climate and Soil of the same Temperature as the Place of their native Growth.

The want of new Seeds and Plants, which are hard to be obtained and transported with vegetable Life in them, so far as from the East at the West Indies, is a great Obstacle; but nevertheless, may in Time be surmounted.

The Genius and Industry of the British Nation for planting and cultivating new Lands, and raising every Production their Soils and Climates in America are capable of producing, promise great Things on this Head, especially as the Colonists are encouraged by the Society for the Encouragement of Arts, Manufactures and Commerce, by the many Premiums they have offered for the raising new Productions in America, which Encouragement is said to be seconded by several of the Governments in the Colonies; which makes it more than possible, that in Process of Time, all the vegetable Productions, that are raised in the southern Parts of Europe, may be raised in the Colonies in great Abundance. These and other Considerations set before us the pleasing Prospect of the Trade to America, greatly increasing, to the reciprocal Advantage of the Colonies and their Mother Country.

It is not my Intention here to play the Geographer, or to dip into Politics, or commence Historian of any Class, either Political or Natural; these Subjects are amply treated of by many Authors of various Nations in Europe, in their respective Languages; insomuch, that a Collection of Books wrote on the Assars of America would make a very considerable Library of themselves; and the respective Writers on these Heads, and what is found in Collections of Voyages and Travels, seem to have quite exhausted their respective Subjects, and must wait for new Events, Discoveries and Circumsances, to furnish them with new Materials surther to expaniate on their respective Subjects, which no doubt Time will amply supply them with.

My

My Province here is that only of a numerical Writer, a dry tedious and elaborate Subject for an Author to execute with Exactness; and it must be confessed, has nothing in it to recommend it to those Readers who are only pleased with Strains of Eloquence and literary Compositions, that abound with Wit and Humour; but I hope, nevertheless the Class of Readers, for whose Use this Work is designed, to wit, the Planters, Merchants, Factors, Brokers, and all concerned in the Trade to America, will find their Account in consulting my Book on such Occasions, and on such Accounts, as their Affairs may

require.

The whole Work is entirely New, every Table therein contained being originally done by myfelf, there being not one fingle Transcript from any other Author in the same. The Plan is founded on my own long Experience whilst I was concerned in Mercantile Affairs in America, for the Space of upwards of fifteen Years, together with the Prompts, Advice, Hints, Directions and Informations I have received from Gentlemen well versed in American Affairs, both by personal Conversation, and by Letters I have been favoured with, all which Gentlemen are Subscribers to this Work, and for whose Asfistance, as well as their Encouragement, I hereby acknowledge myself highly obliged. I have been able to avail myself very little by reading even the best American Histories, or other Books on American Affairs, which have afforded me but very small Light towards laying my Plan; and have received more Information from one fingle Letter, from an Encourager and Correspondent, well versed in American Affairs, and a Resident here, than in turning over Volumes of American Histories, &c. As I have laid my Plan by the Help of the best Lights I have been able to obtain, so have I spared no Pains in executing it with the greatest Exactness, and have attended the Press with more than usual Care to prevent any Errors creeping in that Way, and am not sensible of any Error of Consequence in any one fingle Table, the Tables all proving them elves; fo that no Error can be committed, if they are rightly used, as is directed in the Examples of their Uie.

It is needless to say much on what induced me to set about this Work, and to finish it, let it suffice to say, that I thought such a Thing would be useful in the World, especially to Gentlemen concerned in American Affairs; and it is evident I thought right, by the very numerous Subscription the Work has been savoured with; and I hope the Subscribers will meet with no Disappointment in their Expectations, as the Work fully contains what is promised in the printed Proposals and Title Page, besides many Articles of Use not promised therein.

Why a Work of this Nature has not appeared before for the

Trade to America, requires as fhort an Answer :

Firft,

First, As a Book has been lately published for the Exchange for the Eastern Commerce, and met with a good Reception, I thought one for the Western would meet with the same.

Secondly, It feldom happens, that a proper Degree of Know-ledge, Experience, Abilities, Leisure and Inclination, coincide or meet in the fame Person, to induce him to set about the producing a new Thing of a particular Kind; which may be the Reason why new Things are late in their Birth, which often make them lay in the Womb of Time till all these Requisites unite to bring them forth to Light.

Of the AMERICAN CURRENCIES.

The feveral Provinces on the Continent of North America; and also the Leeward Islands, and Jamaica, subject to the Crown of Great-Britain, have, ever fince their being fettled, or subject to the said Government, or at least within these seventy Years last past, varied greatly in the way of Reckoning their Monies, or Currencies, from what has been by Law ettablished in England or Great-Britain. The Currencies in the Colonies have fluctuated and varied so much, that they have differed greatly both as to Time and Place, feldom being the same in two different Provinces at a Time, and often changing Value in the same Place. In some of the Provinces they have deviated so much from Sterling Money, in the Way of reckoning their Monies, and run on to fuch a Degree of Depreciation, that two Shillings Sterling hath become equal to one Pound nominal Currency; or one Pound Sterling equal to ten Pound. At Boston in New-England, they run on in a continual Course of Depreciation in the Space of 47 Years, in an irregular progressive Advance, from 133 l. Currency for 100 l. Sterling to 1100 l. Currency for 100 l. Sterling ; - A State of all the Degrees of Depreciations in the respective Years the Variations or Changes happened, from the Year 1702, to the Year 1749, together with the Value of Silver, both by the Ounce and Dollar, that correspond with the said Depreciations, are set down in the following Table.

Years,	Exchange,	oz. of Silver Cu	. Dollar Sterl.
1702	133	6s. 101d.	4s. 6d.
1705	135	7s. od.	45. 61d.
1713	150	8s. od.	45. 61d.
1716	175	9s. 3d.	4s. 7d.
1717	225	12s. od.	4s. 7'd.
1722	270	14s. od.	4s. 61d.
1728	340	18s. od.	43. 7d.
1730	380	203. od.	4s. 71d.
1737	500	26s. od.	4s. 6d.
1741	550	28s. od.	45. 5d.
1749	1100	69s. od.	45. 8 1d.

Their Money having thus run on to 1100 l. Currency for 100 l. Sterling, or 11 for one, a Stop was put to the farther Depreciation of the Money of the Province of Maffachusett's Bay, in the Year 1750, by a Remittance in Money fent over from England, to the Amount of 183,000 l. Sterling, to reimburse the Expence that Province had been at, in the Reduction of Cape Breton in a former French War; the Money was mostly composed of Spanish Dollars. Their depreciated Paper Money, or Province Bills, were called in and paid off, at the Rate of 45 Shillings Currency for each Dollar, and the Bills burnt and deftroyed; and a Law made, by which the Par of Exchange with that Province and England is fixed at 1331 1. Currency for 100l. Sterling, and the Dollar at 6s. the same Currency. This Change was a pleafing Event, especially to those who had Correspondence with that Province. But I have been informed, that though they are obliged to keep their Accounts agreeable to the faid Law, yet fince that Time they have for some Years negotiated their Bills with England in old Tenor, or the old Currency, and that so late as within few Years last past, which is the Reason I have carried the Tables of Exchange fo far as 1000; but I am just now informed, by a Gentleman lately arrived from Boston, that that Practice is now entirely laid afide; however, if the Tables that are carried fo far cease to be useful at present, in what regards the Trade of that Province, they may some Time or other be useful for others.

The Currency of Rhode Island, has run on in a Course of Depreciation, from the Years 1744 to the Year 1759, from 450 l. to 2300 l. Currency for 100 l. Sterling.—An amazing Depreciation indeed, which made the Trade carried on by that Province (which is pretty considerable) perplexing to themselves and their Correspondents; but I am informed, they are endeavouring to put a Stop to such a mad Depreciation, and to put their Currency under some Regulation, which it is to be hoped by this Time is effected.

The

The Currency of Rhode Island, fince the first Publication of this Book, has been regulated by a Law made in that Country, and their Currency put upon the fame Footing with that of Boston in New England; a Regulation long desired and now happily accomplished, much to the Satisfaction both of the Merchants and Traders residing there, as well as their Correspondents in other Parts of the World.

The Currencies of several of the Provinces have at Times gone backwards and forwards in varying their Exchanges with England, some seem to be fixed, and others in a variable Situation. The Pars of Exchange with the several Provinces are

at prefent, or lately were;

By very late Information from Quebec and Montreal, as also from Halifax in Nova Scotia, Anapolis and the Bay of Fundy, the Rate of their Currencies may be fixed at 108, 109 or 110, the feveral Species of Money Current in all these respective Places, at present indicate, that these must be the equitable Rates of Exchange, the Dollar passing in them all for 5s. the Pistole for 18s. the English Guinea for 22s. 6d. the Johannes or 36 s. Piece for 38s. 6d. and the Moidore for 29s. in their At Quebec and Montreal the New York respective Places. Traders, which supply the Places with Provisions, deal with the Inhabitants in New York Currency, in receiving Dollars at 7s. 5d. and Gold in Proportion. But thefe Exchanges and Values of Money in Specie in those Places may be no Standard for after Times, as they may probably foon vary, and for fuch Circumstances of Variation the Tables in this Book are suited, and will always ferve.

A Question naturally will arise: How hath it come to pass or what is the Reason, that the several Currencies of the British Colonies have differed so much one from another, both in respect to Time and Place, and still do differ, from what is

by Law established in England?

In Answer to which, I hope the following Reasons will in a great Degree be satisfactory. The several Provinces in their Intancy had but little Trade, and consequently little Money. The Tools, Utensils, and Necessaries for Planting, they were

at first supplied with from Britain, involved them in Debt, before they were able to raise Goods for Exportation to pay their Creditors; and the Goods they first raised were often so ordinary in Quality, or so little in Quantity, that they were able to export to a foreign Market, that the net Proceeds of the same often turned out poorly, by which Means the Planters remained continually in Debt to the British Merchants, and occasioned the Balance of Trade to be always against them; and having neither Goods nor Cash sufficient to remit their Creditors, the Consequence has been, that many bad Debts have been made, and great Losses sustained, as the Merchants of Great Britain

have but too fatally experienced.

When the Northern Colonies became more thriving, and by the Produce they raifed were enabled to fupply the Sugar Islands with Provisions, as Flour, Bifket, Salt-Fish of feveral Sorts, Horses, live Sheep. Hogs, Geese, &c. besides what is called Lumber, viz. Timber, Staves, Heading and Hoops, &c. they drew Money from thence; the only Sources they at first, or even at prefent can be furnished with a Supply of Money; (the Remittances made thither in the 2 last Wars excepted) the Money they imported from the Islands together with their Produce, were not fufficient to fupply their Creditors in Britain, which prevented the Cash staying with them, and obliged them to ship it off with their other Merchandize towards paying their Debrs here, which obliged the Provinces to create and iffue Bills of Credit, commonly called Paper Money, to circulate in Trade among themselves: Gold and Silver being as much a Merchandize as any they dealt in. The Trade of the Northern Colonies cont nuing for many Years in a bad State, and the Balance with Britain always against them, occasioned the ready Money they had amongst them to be picked up by the Merchants and Factors residing in America, acting for their Corespondents or Employers in Britain, and Cash or Bullion being a certain Remittance preferable to Bills of Exchange or Produce, which were very precarious, the Eills being often fent back protested, and the Goods coming to a bad Market; this made the Merchants and Factors rival each other in purchasing Gold and Silver, and from Time to Time raised the Price; and in Proportion as the nominal Value of the same advanced, the Price of Bills, and the Rates of their Currencies, kept Pace with it, and proportionally depreciated as the nominal Value of the Specie advanced, compared with the Value of Money in Britain.

This is evident, by cashing an Eye on the Table of the Course of Dep eciation of the Currency of Baston, inserted in the preceding Pages; wherein it appears, that the nominal Prices of Silver the Ounce in that Province, for the Space of 47 Years, was always nearly proportionable to the depreciated Rates of Exchange in the Periods of Time the said Currency

varied:

varied; and it is not to be doubted, but the Change of the Value of Money preceded the Alteration of the Exchange.

From what has been said it may naturally be inferred, that in whatever Prevince in British America, whose Trade does not import them so much Cash from one Quarter, as the Demand is upon them from another, or in other Terms, which have the Balance of Trade against them, their Currency will be unstable, and subject to Depreciation. As contrary Causes always produce contrary Effects, so in the Affair under Consideration it appears, that the Islands and Provinces that have a flourishing Trade, and an Instax of Money to answer foreign Demands upon them, that their Currencies have fixed for a

long Time in one State.

In the Island of Jamaica, in Confequence of its great and valuable Productions, and the Cash it imports from the neighbouring Fountain Heads, the Spanish Islands and Continent has preserved its Currency in one State for many Years; has never had the Use of Paper Money, nor even Copper, their current Money being all Gold or Silver, neither has the Price of Bills varied in 20 Years, always being at 140. And it is much the same in the other Sugar Islands, except the Price of their Bills are subject to vary. New York and Pensilvania Currencies seem fixed for the same Reason; and it is to be hoped, more of the Provinces will be able to keep their Currencies from further depreciating.

It may be of Use to some Readers to note, that to what ever Degree of Depreciation the Currencies of the Colonies have been at, the Denomination of Pounds, Shillings, Pence and Farthings, have been retained, although they have none of

the Money amongst them of these Denominations.

A Description and Use of the TABLES.

The first is the Table of General Pars of Exchange, which I so call, because it is not universal, but extends, I hope, even beyond any Degree of Depreciation the Currencies of the Colonies may undergo in suture, or ever yet ran to; but I thought it convenient to carry it so far, as to suit such Variations as are but barely possible; and in this, as well as in some other Things in this Work, I may be censured for being too prolix in the Extent of my Tables; but as it is a Fault on the right Side, I hope will plead my Excuse without any farther Apology.

This Table shews, at one View, what the exact equitable Pars of Exchange in any of the Provinces is, the nominal Value of the Spanish milled Dollar or Ounce of Silver is rated at

in any of them (as the Title to the Table fets forth) being known. I have not only fuited the Table to a very extensive Variation of the Value of the Dollar, and Ounce of Silver, but likewise adapted it to five different Variations of the Price of Silver in Britain, which naturally affect the Pars of Exchange, as is feen in the Table, which every one who understands but the common Rule of Three direct, may clearly fee the Reason of, the Prices of Silver in England at the Head of the Columns, are supposed to be the Average Values for a considerable Space of Time, and not every fudden Start of the Price of Silver. The Table may be made more general in its Use, if the average Price of Silver should, in Process of Time, exceed what is put at the Head of the Table; for if the Numbers in the Body of the Table be read collaterally from the Left-hand to the Right, the Difference among the Pars are nearly equal; fo that for every Halfpenny average Variation, it is but substracting so many Times that Difference from the Figures in the last Column, and the new Par of Exchange is obtained.

By this Table a Merchant may see with the Glance of an Eye whether the Price of Bills is under or above Par, if he compares the Nominal Value the Dollar or Ounce of Silver is rated at in any Province; and the Par of Exchange in the Table answering thereto, with the Price he gives or receives for Bills, Regard being had at the same Time to the average Price of Silver in Britain.

The Use of this Table, I think, may be best illustrated by comparing the various Rates of Exchange at Boston in New England for the Space of 47 Years, as is put down in the foregoing Pages, and the Value the Ounce of Silver was rated at, answering the Rates of Exchange, and the Dates respectively. Here follows a Repetition of the Date of Years, the Rates of Exchange, and the Value of Silver the Ounce, as it was in Boston corresponding with the Rates of Exchange, and the Times respectively: To which is added, the Equitable Pars of Exchange, taken out of the Table of General Pars, that answers to the respective reputed Values of Silver at the different Periods of Time.

TOUS OF T	mic.			
Years.	Exchange,	Oz. of	Silver.	Pars from the Tab.
1702	133	6s.	101d.	1321
1705	135	7	0	135
1713	150	8	0	1531
1716	175	. 9	3	177
1717	225	12	0	232
1722	270	14	0	272
1728	340	18	0	344
1730	380	20	0	383
1737	500	26	0	500
1741	550	28	0	544
1749	1100	60	•	1156
		1		The

The Pars are taken out of the Table against the Value of Silver the Ounce, as above, at the lowest Rate of Silver in England, viz. 45. 6d. the Dollars, and are the equitable ones at that Rate, and though they differ fomething from the feveral Rates of Exchange that from Time to Time prevailed at Boston in New England, which propably might be occasioned by the Rife and Fall of the Price of Silver at different Times; befides, many Things are ruled by Custom contrary to equity and Reason, but the Difference is inconsiderable in this Respect. If this Table be duly attended to, any Merchant, Commander of a Ship, or Factor, &c. on their first Arrival in any Part of British America, may directly inform theinselves what the Rate of Exchange is between that Place and Great Britain, the Moment they are informed what the Spanish Mexico Dollar of 17 dws. 8 Grains passes for in the Province where they are, or what the Ounce of Silver is rated at in the nominal Currency of the fame, and may from thence form a Judgment how to put a proper Price on the Goods and Merchandize they have to fell, in order to fecure to themselves a reasonable Profit, or what Prices to give for American Productions to thip for Returns to the European Markets, and may in half a Minute be as well informed of these Particulars by the Help of this Table, as by an Hour's Trouble in Computation, or a Year's Experience and being on the Spot. I myfelf, on my first Arrival at the Island of Jamaica in the Year 1737, was a considerable Looser in the Disposal of a Venture I carried with me, in not knowing rightly the Value of the Money current, compared with Sterling.

The Tables of American Exchanges are next, and extend from Pages 13 to Page 179, and perform what their Titles set sports; and it his hoped, abound with such Variety of Rates, as to answer all Occasions, Times and Places, to answer the Purpose of them who may have Occasion to refer to them. They readily alternately turn Plantation Money into Sterling, and the contrary by Inspection, at the various Rates of Exchange they extend unto, and the Use of the Merchants, Planters, Factors, and others, may make of them; both in Regard to the settled Pars of Exchange, and the Prices of Bills of Exchange, are so obvious as to require little Explanation; a few

Examples may fuffice.

EXAMPLE I.

If a Merchant in Great Britain receives Advice that his Factor, or Correspondent at Boston in New England, has shipped him, in a certain Ship, a Cargo, amounting as per Invoice to 5737 l. 108. lawful Money of Boston; for how much Sterling must the Merchant make Infurance to cover the Risk of the

the said Adventure, the Under-writers to pay, in case of Loss, as Interested may appear? The Exchange being 1333, collect the Sterling answering to the Boston Money out of the Table, Page 322, and you have the Answer as under.

	Lawful Money of Boston. Sterling.								y ufi ige 3	ng the o		
1.	s.	d.	1.	s.	d.	q.	1.	s.	d.	1.	5.	d.
5000	0	0	3750	0	0	0	4000	0	0	5333	6	8
700	0	0	525	0	0	0	300	0	0	400	0	0
30	0	0	22	10	0	0	3	0	0	4	0	0
7	0	0	5	5	0	0	0	2	0	0	- 2	8

5737	10	•	4303	2	6	0	4303	2	6	5737	10	0
							1	1111		No.		_

The Value of the faid Adventures is 4303 l. 2s. 6d. Sterling; and to prove that both the Tables and the Work is right, the Sterling is reduced back again into Currency, and makes exactly the fame as the given Sum; and of fuch a Proof all the Tables will admit of, and of Course may be used with absolute Certainty.

EXAMPLE II.

The Amount of an Invoice, neat Proceeds of Sales, Balance of an Account, outstanding Debt, Mortgage, or the Interest thereupon, to the Value of 9575 1. 6s. 6d. Jamaica Currency, what is the Sterling Value, Exchange 140? From Page 34 you have;

Jama	ica	Cur.	St	terli	ng,		Sterli	ng,			Fan	naic	a M	lo.

		Algaria d					6839	10	4	2	9575	. 6	6	

The given Currency is 6839 l. 10s. 4d. 2q. Sterling, and by a contrary Reduction the first Sum is produced, which is a

Proof the Work and Tables are right.

For the Accommodation of the Merchants, Planters, and Factors concerned in the South Carolina Trade, I have calculated Tables that rise and Fall 121 above and below Par; and I have been induced to do this, as the Currency of South Carolina, though in a depreciated State, being 7 for one, or 700 l. Currency for 1001. Sterling, feems to be fixed, as it has continued the same for many Years last past; and if the Rate of their Par of Exchange be compared with the nominal Value of the current Cash they circulate, it will be found to be as good Money as any on the Continent; for if you turn to Page 7, of general Pars, and look for 31s. the nominal Value the Dollar hath paffed for in that Province for some Time, you will find that the equitable Pars corresponding with the faid Value of the Dollar, and different Values of the same in England, are 689, 683, 676, 670, 664, by which it appears, that if the circulating Dollars are full Weight, they are rather undervalued, 31s. 6d. or 32s. feems to be the most equitable Value; but Advice has lately arrived from South Carolina that they have, by a Law, fixed the Value of the Spanish Mexico Dollar at 325. Currency, which, by referring to the Table of Pars, will be found to be a very just Settlement of the Price, both in regard to the Exchange with Britain, and the Currency of South Carolina, and the other British Colonies one with another, which Alteration, or Regulation of the Value of the Dollar in South Carolina, I am confident was in a great Degree occasioned by this Book, by considerable Numbers falling into the Hands of the Gentlemen in Trade in that Province, and using the Table of Pars, and the agreeable Alteration of the Currency of Rhode Island might probably arise from the same Caufe.

I have been induced to calculate these Tables that advance 12 \(\frac{1}{4}\) above and below 700, because such a Rise and Fall in aegotiating Bills of Exchange, is nearly proportionably to 2\(\frac{1}{2}\), in such of the Currencies as are under 200, which is the accustomary Variation in the Rise and Fall of the Exchanges. I shall only give one Example more in direct Exchanges, and that for this Province.

EXAMPLE III.

A Merchant in Charles Town, South Carolina, has Occasion to remit, in Bills of Exchange to his Correspondent in England, 2150l. 10s. that Province's Money, for how much Sterling that the Bills be drawn for, supposing the Exchange at 71212

	152, ey,	Page	ing	3, back	by red	ucin into	Cui	the					
L	s.	d.	1.	s.	d.	q.				1.			
2000		0	280	14	0	2	300			2137			
100	0	0		0				0	0	7	2	6	0
50	0	0	7	0	4		0	16	0	5	14	0	0
0	10	0		1				0		0			
2150	10	0	301	16	6	•	301	16	6	2150	10	0	3

The Bills must be made out for 301 l. 16s. 6d. Sterling; and that appears to be the right Sum by the Proof, only differing 3 Farthing South Carolina Money, which is not half a Farthing Sterling. Of the like Proof all the Tables of Exchanges will admit of both for America and Ireland; and such Proof will seldom differ from the first Reduction, more than one Farthing Sterling. The said small Difference arises from the Defect of the Fractions, which could not be avoided, without incumbering the Tables with fractional Parts of the Farthing, in all the Numbers, a Thing, I thought more troublesome than convenient, both to myself and Readers. Several Ways might be shewn how to prove the Truth of what is done by the Tables; but as the Method in the Examples above shewn, is the most easy, natural and exact, it is needless to instance, or make Use of any other. If the Reduction is performed by Calculation, the Tables may be used to prove the Truth of the same; farther particular Uses of the Tables of Exchanges are the following.

I. The Reducing the Sterling Value of every particular Article in the Invoice of an outward bound Cargo, into the Currency of the Province to which they are configned, which, if put in Practice by the Factors and Supercargoes who have the Disposal of Merchandize in the Colonies, I presume they

would find it very convenient.

2. The Merchants refiding in Britain (on receiving the Account of Sales of their Goods from their Correspondents in America) may readily know what Sort of a Market their Goods came to, by turning the Plantation Money into Stepling, either for the whole Amount, or for a particular Article.

3. As it is necessary, that the Merchants in Britain state their Accounts Current with their Correspondents in the Plantations, by having double Columns on each Side of their Ledger, to enter the Foreign Currency and Sterling in, the Tables of Exchanges will be found to be very ready to make such Reduction

duction, as of Course must be made in keeping Accounts in that Method. This Way of keeping the Account Current in the Ledger is absolutely necessary, when the Correspondent in the Plantations is a Factor, or acts for Account of a Merchant in England; for the Account cannot be regularly closed without both Currencies be flated therein; for when the Merchant here receives the Factor's Account, Sales and Account Current, he debits himself in the foreign Money, and credits himself for the Cost and Charges of Goods he ships for Account of his Correspondent, and likewise for what foreign Money he disburses for the Purchase of Bills of Exchange in the same Money; and it may often happen, that a confiderable Lofs or Gain may be occasioned by the Factor's obtaining Bills above or below Par, which will appear on the closing of an Account Current kept in this Manner and the Lofs or Gein by the Exchange must be carried to the Account of Profit and Lofs, as it may happen.

It is not less expedient, that the Merchants trading between Ireland and Britain, should keep their Accounts in the Way above mentioned; as generally a Lofs or Gain will happen on the Close of an Account Current, on account of the Rife and Fall of the Course of Exchange; an Instance or two will shew it. A Linendraper in London has a Cargo of Irish Linen configned him on his own Account, from a Merchant in Dublin; to the Amount of 52501. Irish Money, for which the Irish Merchant draws upon him for the whole, Exchange at 109. Loss or Gain of the Linen Draper, on his paying the Bills, and closing the Account Current .- First, 5250 l. Irish Money at the Par of Exchange 1081 Page 260 will be found to be 48461. 3s. 1d. Sterling. Secondly, the Irifb Merchant's Draught on the Linen Draper, at the Rate of Exchange current 109, will in Sterling Money, by Table Page 294 be found to be 4816 1. 10s. 32d. Sterling; by which it appears, that the Linen Draper gains 291. 128. 91d. Sterling by the Course of Exchange being at above Par, when his Correspondent drew upon him. The contrary would have happened, if his Correspondent had drawn upon him when the Exchange was under Par, as much as it is above in the Cafe here stated.

In the first Impression of this book, the Tables of American Exchanges advanced only $2\frac{1}{2}$ each Leaf from Exchange 115 to 200; which Gradation, I was informed by Gentlemen well versed in the American Trade, was sufficient to answer all the Variations of the Rise and Fall of the Course of Exchanges in all the British Colonies where the Pars of Exchange are under 200; but fince that Time I have been employed in settling several Accounts relating to the American Trade, and have found in several Instances, that the Course of Exchange has risen and fallen one Pound at a Time in several of the Provinces in North America and those to which great Trade is carried on,

as Philadelphia, New York, Virginia and Maryland. Therefore, to-render the present Impression of this Book more perfect, I have, from Page 42 to Page 112, inserted 48 Pages of new calculated Tables, rising one Pound a Step, and have at the same Time, and in the said Chain of Tables, retained the Tables that rise and sail 2½; and to give Room for so material an Improvement of this Edition, I have taken away all the Tables of Exchanges that were in the former Impression from 200 to 500, as being at this Day intirely out of Use. The Tables from 500 to 1000 stand the same as in the former Edition in regard to the Variations that may happen to the Currency of South Carolina.

The Use of the Tables of Interchangeable Reduction.

These Tables extend from Page 181 to Page 257, and perform what their general Title sets forth. They are sounded on the same Principles as the universal Rule for the arbitrating Exchanges throughout the commercial World, and on which the Pars of all trading Nations are sounded, that is, to receive so much intrinsic Value in real Money, in one Country, as is paid in another, if the Way of accounting, or Difference of the Specie, vary ever so much.

EXAMPLE I.

What is 5501. New York Money in the lawful Money of Boston, the Dollar passing for Ss. in the former, and 6s. in the latter Places.

50	0	0	125	0	0	5	0	0		10	0		
550	0	0	13 5	0	0	1375	0	0	412	10	0		
-					_								

By using two Tables as above it appears, that 550l. New York Money is equal to 412l. 10s. od Besten Money. In like Manner, and with the same Ease, the Currency of any two Places may be reduced into each other, the Value of the Dollar in both being known.

Sterling

Sterling and Irish Money may in this Manner be readily reduced into any of the Plantation Currencies, and the Contrary; by first finding the Number of Dollars that are contained in the Sterling Money; at the Price Silver passes for in England; and then find the Value in Plantation Money of the said Dollars, at the Current Price they go for in any Province. Irish Money is reduced interchangeably just the same Way, by valuing the Dollar at 5s. Irish Money, which I think an equitabe Valuation, as may be seen by the first Line in the Table of Pars.

EXAMPLE II.

A Merchant in Philadelphia configns a Cargo of Flour to his Factor in South Carolina, amounting as per Invoice to 1579 l. 10s. od. Fenfilvania Money, how much is the Amount thereof in Carolina Money at prime Coft, the Dollar being valued at 7s. 6d. in Philadelphia, and at 32s. in South Carolina?

Dolla	d, e	n 157	the Num ol. 10s. ill by Pa z.	od.	at	7 Rya will b to be	ls, by T viz	o 10ths able Pa	at 325	for	ach
						the second second		10th.	1.		
1.	S.	d.	doll.	rs.	10.	4000	0	0	6400	0	0
1000	0	0	2666	5	3	200	0	0	320	0	0
500	0	0	1333	2	7	10	0	0	16	0	0
70	0	0	186	5	3	1	0	0	1	12	0
9	0	0	24	0	0	0	7	0	1	8	0
	10		i	2	6		0		0	3	7
1579	10	0	4211	7	9	4211	7	9	6739	3	7
		-			-			_		-	-

Which shews that 1579 l. 10s. Pensilvania Money is equal to 6739 l. 3s. 7d. South Carolina Money, at the Rates of the Dollar above mentioned. And suppose the said Cargo of Flour cost. 12s. per Hundred Weight, all Charges concluded, in Pensilvania, what must it be valued at in South Carolina to make equal Money. By the Tables used as above 12s. will be found to contain in Pensilvania 1 doll. 4 rs. 8 10ths. and the Value of the same Number of Dollars, Ryals, &c. in South Carolina, at the above Rate of 32s. each, will be found to be 21. 11s. 2d. 1q. South Carolina Money. The reasonable Expectations of Profit at 20, 30, 40, or 50 p. C. &c. may be easily computed of at Hand by any Merchant, Factor, Clerk, &c.

In THE CHAIN

Way of the The

will be a second of the Mark of the MI.

A Cargo of Rice is shipped from South Carolina to Jamaica, Value in South Carolina 20501, what is the equal Value in Jamaica, the Dollar being valued at 325, in the former, and 65, 6d, in the latter Place.

By Table Page 254, 2050 l. South Carolina Money contains in Dollars at 32s. each, viz.

grang N ... 19 19 985 to 50

t.	doll.	rs.	roth
2000 50	1250		
2056	1281	2	0

			able			
each,			rs. a	. 0	5.	· DC
doll.	-012		h. 1.		13	
1000	13.	201	325	3.	d.,	d.
200				0		
	0			0		
1.				6		
0	2	0		1		
-	-	_		•	1	_
1281	2	0	416	8		,
687	10	_	410			1

That is, 2050!. South Carolina Money, is equal to 416 l. 8s. 1d. 2q. Jamaica Money. And suppose Rice costs 55s. p. C. in South Carolina, by the Tables above mentioned, the equal Value in Jamaica Money will be found to be 11s. 2d. 2q. per Hundred Weight, which is equal to the South Carolina prime Cost, which the Merchant or Factor may regulate his selling Price from, as in the last Example.

EX-AMPLE IV.

A Cargo of Beef, Pork and Butter, costs at Cork in Ireland 2750 l. Irish Money, how much is that Jamaica Money, the Dollar being valued at 5s. in Ireland, and 6s. 6d. in Jamaica.

And the Value of any fing'e Article may be found as above.

The Table Page 321 flews the Value of one Penny Weight and Grain of Standard Gold, at the Medium Price of the same in Time of Peace, fuited to the Rates of Exchange expressed therein, in Shillings and Parts Plantation Money. By Help of this Table, the Value of any Piece or Pieces of Gold Coin of any Nation, that may circulate in the Colonies, is found that it ought to pass at in Plantation Currency, if Standard Gold.

RULE.

Take the Number out of the Table, that is against the Rate of Exchange; multiply the same by the Weight of the Piece as it really is, in Penny Weights, and take the aliquot Parts of the tabular Number for the Grains, if any, add the Product and taken Parts together, and you have the true Value of the Piece in Plantation Currency, at the Rate of Exchange fixed upon,

EXAMPLE.

What is the Value of the Spanish Pistole, weighing 4 dws. 8 grs. in Jamaica Currency Exchange 140, against 140 in the Table, is 5 . 4775 Multiply by

Take 3 of the Numbers for the 8 Grains	21 9100	
Multiply the cut-off Figures by	32 7358	
Pence and Parts	8 8096	

Which is 23s. od. nearly, being the Value the faid Piece at present, or lately did pass for in the said Island.

The Refult by Decimals will be the same, if the odd Grains be fuch a Number, as there will be some Trouble in taking out the aliquot Parts out of the Number of the Penny Weights, in such Case you may, if you please, take out the Number, that is the Value of a Grain, against the proper Exchange, and multiply by the odd Grains, add the Product by the Penny Weights, and by the Grains together and you have the Value of the Piece.

From below add	1 8272	
	23 1.737.2	
Value of a Grain Multiply by	2284	
Carried up	1 8272	I

In this Manner the Value of any Piece of Gold may easily be found by Help of this Table, with very little Trouble. But Pieces of Gold will sometimes be found in the Colonies to pass somewhat different from what is determined this Way, but Custom will often prevail avainst Equity and Reason. All such Pieces of Gold Coin, that have a certain known Value in England, and are full Weight, such as Guineas, Moidores and Johannes, their proper and just circulating Value in any Place are found by Inspection in the Tables of Exchanges; which is only reducing so much Sterling into Plantation Currency, as the Value of the respective Pieces pass for in England, Regard being had to the Exchange. But if such Pieces pass under Weight in the Plantations, their Value may be ascertained, by multiplying the tabular Number for the Value of the Grain, that is against the proper Exchange, by the Desect in Weight, and subtracting the Product from the Value the Piece ought to pass for, if full Weight, the Remainder is the true circulating Value of the Piece, short of its due Weight; all which is so

plain, as to need no farther Explanation.

The Table Page 12, which reduces Pieces of Eight into Ounces Troy of Silver, and the contrary, may be used to Advantage by all Merchants, Factors, &c. that refide in America, by directing them to make Choice of fuch Money to remit to Europe, as may turn out most to the Advantage of themselves or their Employers. Whatever nominal Value Silver may pass current for in America, it is no Matter if it is deficient in Weight, whilst it passes uninterruptedly there from Hand to Hand; but if light Money be collected, bagged up and remitted to Europe, there will be certainly as much lost by the Remittance, as the faid circulating Money may be deficient in Weight, for on its Arrival in Europe it will be valued only according to its intrinsic Quality and Quantity .- Spanish (milled) Mexico Dollars are generally full Weight, and will weigh in any Quantity nearly as in the Table, and if under Weight may be detected by it .- The Spaniards are so exact in adjusting the Weight of this Piece of Money to 17 dwts. 8 gr. that a great Quantity of Treasure will fall very little different from it on an Average, for, by a particular Inquiry at the Foreign Cash Office. of the Bank of England, I was informed, that 868 oz. Troy is the Average of 1000 Dollars, which by the Table, at 17 dwts. 8 gr. each, ought to weigh 866 oz. 13 dwts. 8 gr. fo there is only a Difference of 1 oz. 6dwt. 16 gr. in Weight more than the Standard Weight, which is not a Grain a Dollar over Weight.

As Merchants, Factors, &c. in the American Colonies, for want of good Bills of Exchange, or for want of being able to purchase there a good and proper Kind and Quantity of Goods of the Produce of the Country, and at a proper Price to answer

at the European Market as a good Return, must lastly look about them to make such Returns in Specie or Bullion either in coined Spanish Gold or Silver, Bars of either, or wrought Plate, in order to which it is commonly the Practice of the old Traders and established Houses to be continually weighing most of the Money that passes into their Hands, or which they receive, which has the Appearance of being full Weight, or nearly so, they put by, in order to collect a Quantity for Remittances, according to the Emergencies and Nature of their Correspon-

dence and Demand for the same in Europe;

This Practice is worthy the Imitation of all Merchants, Factors, &c. in America that may have Occasion to make Remittances in Specie, for if they do not put this Method in Practice, there are others that will do it for them, and make them pay for it into the Bargain; for if a Merchant, Factor, &c. should not have collected Money, as aforesaid, that is Weight (and to remit light would be a certain Loss) he will be reduced to the Necessity of purchasing heavy Money with light of the rich Jews, and other crafty Ingroffers of heavy Money, and pay a Premium of 4, 5, or 6 per Cent. for the Exchange. This the rich Jews and monied Men, in most Parts of America, make a great Advantage of, for being great Adventurers, and having frequently large Returns in Specie from the Spanish Main, the Havanna, &c. for Negroes, Provisions, &c. they never will pay any of the Money that comes into their Hands that is Weight, but either remit it themselves, or dispose of it to others, as aforefaid.

All Spanish Monies, great or small, either of Gold or Silver, if full Spanish Standard Weight, are sit to remit to Enrope, except a particular Sort which circulate in great Quantities in the British Sugar Islands, which are called Pistareens, whose current Value is two Ryals. Those Pieces of Money, if full Weight, are not sit to remit to Europe, as they are course Silver at least 6 d. Sterling the Ounce under Standard Silver. The Blackness of their Colour is a sufficient Mark to distinguish them by.

The Table Page 320 that reduces Averdupoife Weight into Troy, and Troy into Averdupoife alternately, may be fometimes of Use, for it may so happen that so great a Quantity of Silver, &c. may be wanted to be weighed where Troy Weights sufficient are not to be had, and although Averdupoise Weights are seldom adjusted to that Nicety as to be trusted in determining the Quantity of Gold and Silver where a small Difference in Weight would be of great Consequence, yet, on the Want of Troy Weights, and having Averdupoise Weights that are nearly just, an Estimate may be made whether such and such Sort of Money is above or under Weight.

THE

CONTENTS

A TABLE of General Pars of Exchange, showing, by Inspection, how many Pounds Plantation Currency is equal to one Hundred Pounds Sterling, in Proportion as the Spanish Mexico Dollar, of 17 dws. 8 gr. may pass current for in any of the British American Colonies; or the Value of the Ounce of Silver in any of the faid Colonies, from 5s. (the Spanish Mexico Dollar of the Weight aforesaid) to 140s. and from 5s. 9d. 1, to 116s. 6d. 1 the Ounce (Troy) of Silver; and also in Proportion to the different Prices of Silver (the Ounce) in Great Britain, from 4s. 6d. to 4s. 8d. the Spanish Dollar, of the Weight aforesaid. Including, in the Extent of the Table, all the probable Variations of the Pars of Exchange between Great-Britain and the American Colonies thereon depending that may, or have happened from 111 l. to 3000 l. Plantation Currency, for one bundred Pounds Sterling; ferving as a Key to all the succeeding Tables of American Exchanges contained in this Book. Page 1-11 II. A Table reducing Ounces of Silver into Spanish Dollars, of 17 dw. 8 gra. each, and Dollars into Ounces of Silver. 12 III. The Currencies of the British American Colonies reduced into Sterling, and the contrary, by a Chain of Tables, suiting the various Exchanges between the Colonies and Britain, from 115 per Cent. to 1000; to every one of which Tables are annexed Tables shewing the Value of the Spanish Dollar, or Piece of Eight, of 17 dw. 8 gr. Weight, proportionable to the Value of Silver the Ounce in Britain, from 5s. to 5s. od. the Ounce; and the Value of the Spanish Piftale, of 4 dw. 8 gra. in Proportion to the Value of Gold the Cun e in Britain from 775. to 80s. both which Values in Currency, in every Page, are fuited to the Rates of Exchange at the Head of the Tables. 13-179 IV. A Tuble Shewing the Value of one Grain of Gold, and Rates of Exchange expressed therein, and at the Medium

every three Grains of Silver, proportionable to the feveral Prices of Gold and Silver in Great Britain.

V. Tables of the Value of the Spanish Mexico Dollars in Plantation Currency; and the Dollars, Ryals, &c. contained in any Number of Pounds, &c. in the like Currency; at the several Prices the said Dollar hath, is, or may be valued at, or pass current for in the British American Colonies, from 4s. 6d. to 45s. the Dollar of general Use for the Reduction of the several Currencies of the said Colonies in Great Britain and Ireland, into each other interchangeably. 181-257

VI. Money of the Kingdom of Ireland reduced into Spanish Dollars, and the contrary.

VII. Tables of the Money of the Kingdom of Ireland reduced into Sterling, and Sterling into the current Money of the said Kingdom, suited to the several accustomary Variations of Exchange, from 1051. to 1121. Irish Money for 1001. Sterling, including the Table of the Par of Exchange, which also shows the Value of Gold and Silver per Ounce in Irish Money, proportionable to the said Par of Exchange, and the various Values of Gold and Silver, as they may, from Time to Time, happen to change, or to be at in Britain.

VIII. Averdupoise Weight reduced into Troy Weight, and Troy Weight into Averdupoise.

IX. A Table, shewing the Value of a Penny Weight, and of a Grain of Gold, in Plantation Currency, at all the Rates of Exchange.

X. Lawful Money of Boston in New England reduced into Sterling, and the Value of the same in Dollars and Ryals;

the Value of the Dollar 6s. Currency.

XI. Sterling reduced into lawful Money of Boston in New England, and the Value of the same in Dollars and Ryals; the Value of the Dollar 6s. Currency.

XII. Sterling reduced into New York and Pensilvania Currency, at the Rates of Exchange the Forces in America are paid. Dollar Sterling 4s. 8d.

XIII. New York and Penfilvania Currency reduced into Sterling, at the Rates of Exchange the Forces in America are paid. Dollar Sterling 4s. 8d.

A TABLE, shewing the Value of an Ounce Troy of Silver, proportionable to the Value of the Spanish Dollar of 17dwts. 8 gr.

The Tables from Page 182 to 206, belonging to the Chain of Tables for interchangeable Reduction, have, in common with the rest of the Chain of the said Tables, the Value of the Dollar expressed at the Head of the Columns; and to fave the Trouble of computing what the Value of the Ounce of Silver is in Proportion to the Value of the Dollar of 17 dwts. 8 gr. this Table is inserted.

The Tables contained between the above-mentioned Pages, are supposed to include the probable Variations of the Price of

Silver in Britain for a Length of Time.

The auxiliary Use of this Table is, that on fixing on the average Price of Silver by the Ounce in Britain, you have the proportionable Value of the Dollar, which is found at the Head of the Tables, by interchangeable Comparison, throughout the rest of the Tables to 45s. the Dollar, the exact Par of Exchange between Great Britain and the Colonies, may be known to as great an Exactness as is done by the Table of General Pars, though not to such a great Variety.

The finding the equitable Pars this Way, will be a Check or Proof of what is done by the Table of General Pars, and of each other. Suppose the Dollar valued at 4s. 8d. Sterling, which answers to 5s. 4d. \(\frac{1}{2}\) the Ounce Sterling, as above; how many Pounds New York Currency, is equal to 100l. Sterling,

the Dollar being valued at 8s. that Currency.

First, 100 l. Sterling, by Page 190, contains 428 Dol. 4 ry. 6 10ths; this Number of Dollars reduced into New York Money at 8s. the Dollar by Page 243, is 171 l. 8s. 7d. which is 171 3, as in the last Table in the Book, and agrees with what is found in the Table of General Pars, Page 4; thus an equitable Par may be found independent of the Table of General Pars, and they will, on Trial, generally agree very near.

The above Total are collected from the TABLES.

1001. Sterling at 4s. 8d. per Dollar, contains by Page

1. s. d. Dol. rs. 10ths.
100 0 0 428 4 6

And 428 Dollars, 4 Ryals, 6 10ths, at 8 s. per Dollars, by Page 243, is

428	4	6	171	1	7	ı

THE

AMERICAN NEGOTIATOR.

A TABLE of General PARS of EXCHANGE.

SHEWING, by Inspection, how many Pounds nominal Plantation Currency is equal to one hundred Pounds Sterling; in Proportion as the Spanish Mexico Dollar, of 17 dws. 8 grs. may pass current for in any of the British American Colonies; or the Value of the Ounce of Silver in any of the said Colonies, from 5s. (the Spanish Mexico Dollar of the Weight aforesaid) to 140s. and from 5s. 9d. 4 to 161s. 6d. 4 the Ounce (Troy) of Silver; and also in Proportion to the different Prices of Silver (the Ounce) in Great Britain, from 4s. 6d. to 4s. 8d. the Spanish Dollar, of the Weight aforesaid.

Including, in the Extent of the Table, all the probable Variations of the Pars of Exchange, between Great Britain and the American Colonies thereon depending, that may, or have happened from 111l. to 3000l. Plantation Currency, for one hundred Pound Sterling; ferving as a Key to all the succeeding Tables of American Exchanges contained

in this Book.

THE

CURRENCIES

OF THE

BRITISH AMERICAN COLONIES

Reduced into STERLING, and the Contrary,

BY a Chain of Tables, suiting the various Exchanges between the said Colonies and Britain, from 115 per Cent, to 1000; to every one of which Tables are annexed Tables, shewing the Value of the Spanish Dollar, or Piece of Eight, of 17 dw. 8 gra. Weight, proportionable to the Value of Silver; the Ounce in Britain from 5s. to 5s. 9d. the Ounce; and the Value of the Spanish Pistole, of 4 dw. 8 gra. in Proportion to the Value of Gold; the Ounce in Britain from 77s. to 80s. both which Values in Currency, in every Page, are suited to the Rates of Exchange at the Head of the Tables.

I have inserted Tables in the two last Pages for the Use of the Officers in the Army, employed the late War, on the American Expeditions, the Pay-Master-General, Deputies and

Clerks, and at which Rate they are at prefent paid.

They are founded on the Proportions of valuing the Spanish Dollar at 4s. and 8d. Sterling, and the same at 8s. in New York, and 7s. 6d. Pensylvania Currency, making Pars of Exchange as at the Head of the Tables. It may be observed they receive fomething less, than if they were paid at the commonly estimated Pars of Exchange of these respective Places; which in the former is 1.75, and in the latter 165. But as the Exchange they are paid at, is little less than what they can purchase good Bills at, they have little or no Reasons to complain of Injustice. An Example or two will make it clear.

EXAMPLE.

It appears that his Loss is about one Pound Sterling; an inconfiderable Deduction; if it be considered, that the Dollars cost the Government more than 4s. 8d. each in England, besides the Risque of sending them to America to pay the Forces.
